Sample Vision Statements

The following vision statements come from several rural primary care clinics that are implementing Collaborative Care:

**Vision – Valley View Health Center**
Valley View Health Center’s Vision Statement for creating a healthy community:

- We recognize the value of all of our resources such as employees, grants and other funding sources and we all are responsible for cultivating and respecting those resources.
- We believe that care needs to be delivered in the communities where our patients live.
- We are a collaborative model with Medical, Dental and Behavioral Health working together for the best, measured, clinical outcomes for our patients.
- We respect that every patient is unique and has his or her own individual and cultural values.
- We focus our services to those patients who have chosen us as their primary health care home.

**Vision – Partnership Health Center**
Partnership Health Center makes the daily commitment to incorporate Collaborative Care into our comprehensive primary health care services, strategic goals, and our partnership with community resources.

**Vision – CHC of Central Wyoming**
We envision an organization in which our collaborative, multidisciplinary team will deliver sustainable, high quality, affordable, whole person care, eliminating stigmas surrounding chronic mental and physical illnesses. We will improve our patient’s quality of life through barrier free communication.

**Vision – KANA**
The IMPACT Program will support and further KANA’s mission to elevate the quality of life of those we serve by creating a sustainable model where providers and patients work as a team. We intend to improve health outcomes by using a patient-centered, collaborative approach to provide high quality care addressing both the physical and mental health of the residents of Kodiak Island.
**Vision – Southwest Montana CHC**

Southwest Montana Community Health Center is using collaborative care with patients who are experiencing depression. Collaborative care will improve outcomes for managing depression by addressing the needs of the whole patient. The collaborative care model will expand behavioral health resources for patients and provide better follow up care by addressing patient symptoms in a consistent manner. Improved quality of life for IMPACT patients is the goal of SWMTCHC.
