

Training Handout for the Online Training for Behavioral Health Care Managers

Thank you for taking the time to learn about Collaborative Care (CoCM) through our online training.

Terms of Use

This handout is a supplement to the AIMS Center's Online Training for Behavioral Health Care Managers. It should not be used as a standalone training tool. We recommend using this handout to take notes during the training as well as to reference after training access concludes.

Distribution

If you are interested in distributing these materials outside of your immediate team, please do so in accordance with our copyright guidelines: <https://aims.uw.edu/who-we-are/copyright-permissions>

About the AIMS Center

The purpose of the AIMS Center is to inspire providers, researchers, and decision-makers to transform healthcare and improve patient outcomes. We accomplish this by translating and researching evidence-based approaches to behavioral health integration. To learn more about the AIMS Center and our work, you can visit our website: <https://aims.uw.edu/>

6

Evidence Base for Collaborative Care

More than **80 randomized controlled trials** have shown collaborative care to be more effective than usual care for common mental health conditions such as depression and anxiety.

First demonstrated in the **IMPACT Trial**.

9

IMPACT Trial: Summary

- Improved outcomes
 - Less depression
 - Less physical pain
 - Better functioning
 - Higher quality of life
- Greater patient and provider satisfaction
- Reduced healthcare costs

"I got my life back"

11

Other Models of Behavioral Health Delivery

Traditional Consultation	Co-Location	Primary Care Behavioral Health
Limited access	Access and interaction	Solidly grounded in a clinical practice culture
Limited feedback	Better communication	Generalist behavioral health provider
Expensive	Long waitlists and limited available providers	Rapid access to brief behavioral interventions
One pass	Limited ability for follow through	Limited evidence base

General Care Manager Functions

- **Track and coordinate care**
 - Facilitates patient engagement
 - Performs systematic initial and follow-up assessments
 - Systematically tracks treatment response
 - Supports treatment plan with PCP
 - Reviews challenging patients with the psychiatric consultant weekly

25

Copyright © 2020 University of Washington

25

Care Manager Role in Supporting Treatment Plans

- **Evidence-based brief behavioral interventions**
 - Problem-solving treatment (PST)
 - Cognitive behavioral therapy (CBT)
 - Others
- **Other functions**
 - Behavioral health interventions focused on health behaviors
 - Addressing substance use
 - Social work services

26

Copyright © 2020 University of Washington

26

The Psychiatric Consultant (PC) Role

- **Review cases with the CM using the registry**
 - Scheduled (ideally weekly)
 - Prioritize new patients and patients not improving
- **Consult urgently (as needed) with PCP or CM**

27

```
graph TD
    PCP[Primary Care Provider] <--> CM[Care Manager]
    PCP <--> P[Patient]
    CM <--> P
    CM <--> R[Registry]
    P <--> R
    PCP -.-> PC[Psychiatric Consultant]
    CM -.-> PC
    R -.-> PC
```

The diagram illustrates the roles and interactions in a care team. At the top is the Primary Care Provider (PCP). Below the PCP are the Care Manager (CM) and the Patient. The CM and Patient are connected by a double-headed arrow. The CM is also connected to a Registry (represented by a computer icon) and the Psychiatric Consultant (PC) by double-headed arrows. The Patient is connected to the Registry by a double-headed arrow. The PCP is connected to the PC by a dashed arrow. The Registry is also connected to the PC by a dashed arrow.

27

Principle: Evidence-Based Treatment

28

Copyright © 2020 University of Washington

28

Treatment Options

Bio

- Evidence-based medications

Psycho

- Evidence-based psychotherapeutic interventions

Social

- Social support

- Make BOTH medication and non-medication recommendations
- Support whole person treatment
- The treatment that WORKS is the best one
- Review all evidence-based treatment options available
- Discuss pros and cons of each option

29

Copyright © 2020 University of Washington

29

Principle: Accountable Care

- Access
 - Provide care to more patients
 - Minimize time from identification to care
- Accountability
 - Screening to identify patients in need
 - Make sure patients get better (outcomes)

30

30

2018 NCQA HEDIS Depression Metrics

- Depression Screening and Follow-up for Adolescents and Adults (DSF)
- Utilization of the PHQ-9 to Monitor Depression Symptoms for Adolescents and Adults (DMS)
- Depression Remission or Response for Adults and Adolescents (DRR)
 - Measured by PHQ-9 or PHQ-A (12+ years)
 - Remission within 4-8 months of first elevated PHQ-9

31

Checkpoint

Take a few minutes to reflect on the principles of collaborative care.

1. What do each of these principles mean to you?

2. How is your role aligned with each principle?

Population-Based Care

Measurement-Based Treatment to Target

Patient-Centered Collaboration

Evidence-Based Care

Accountable Care

32

This concludes the module.

36

Culture Clash

Primary Care

- **Action culture**
 - urgency, pace
 - immediate intervention
 - refer to other providers for specialty care

Specialty Behavioral Health

- **Narrative culture**
 - in-depth assessment
 - slower pace

37

Copyright © 2020 University of Washington

37

Collaborative Care Workflow

38

Identify & Engage

- **Identify people who may need help**
- **Screen for behavioral health problems using valid measures**
- **Identify safety concerns**
- **Introduce collaborative care**
- **Engage patient in care**

39

Copyright © 2020 University of Washington

39

13

Identifying Patients Using Behavioral Health Measures

- Behavioral health measures are like monitoring blood pressure!
 - Identify problem
 - Need further assessment to understand the cause of the “abnormality” (high score)
 - Help with ongoing monitoring to measure response to treatment

40

Copyright © 2020 University of Washington

40

Checkpoint: Identify Safety Concerns

- What if a patient has active suicidal ideation?
 - What is your clinic protocol around safety concerns?
 - What is done immediately with the patient?
 - Who would be involved in assessing the patient and initiating care?
 - Who is consulted?
 - What does follow-up look like?

41

Copyright © 2020 University of Washington

41

Checkpoint: Identify

Take a few minutes to reflect on your setting.

- How are patients in need of mental health treatment identified?
 - Who administers behavioral health measures?

42

Copyright © 2020 University of Washington

42

Next Steps after Initial Screening

- Tracking patient scores
 - Electronic health record or registry

PATIENT INFORMATION

Program Information

Clinic : *

Enrollment Date : *

Care Manager : *

Patient ID : *

Notes : *

Psychiatric Consultant : *

- Communication between providers
 - Begin engagement!
 - Warm handoffs or “warm connections”

43

Early Engagement: What the Research Says

- In studies, patients with early follow-up are less likely to drop out and more likely to improve (Bauer, 2011)
- Patients who have a second contact in less than a week are more likely to take their medications (Bauer, 2011)
- Follow-up contacts (phone or in person) within four weeks of the initial assessment is key to early improvement (Bao, 2015)

45

15

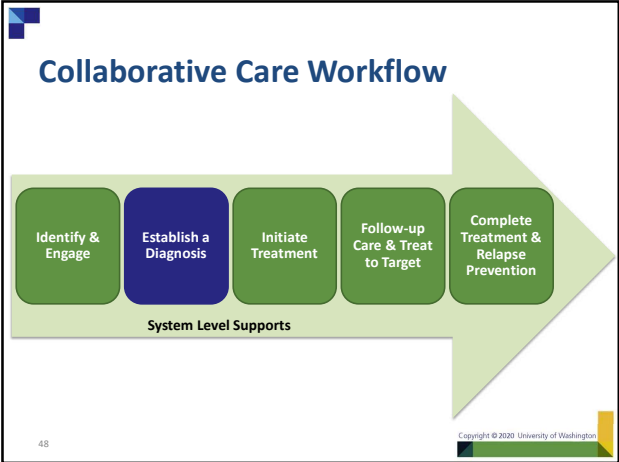

Checkpoint: Engage

Take a few minutes to reflect on your setting.

- How are patients with a positive screener further assessed?
- Who will engage patients in collaborative care?
- How will you introduce collaborative care to patients?

47

Copyright © 2020 University of Washington

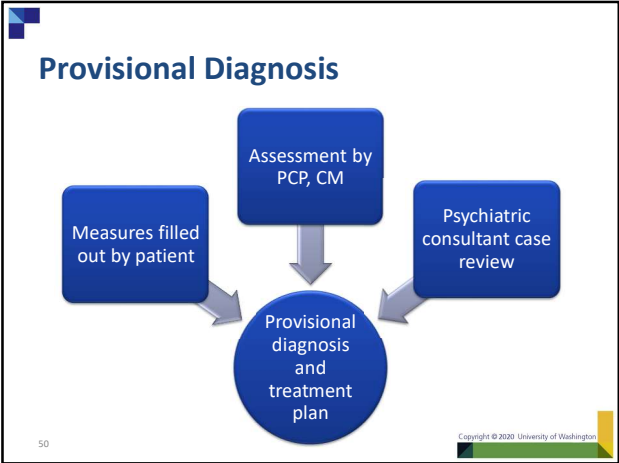

Establish a Diagnosis

- Initial assessment
 - Core areas of screening
- Co-existing medical conditions
 - Identify and treat
- Provisional diagnosis
 - Team decision
 - Focus of case review w/psychiatric consultant
- Patient education
 - About symptoms and diagnosis

49

Copyright © 2020 University of Washington

49

50

Checkpoint: Establish a Diagnosis

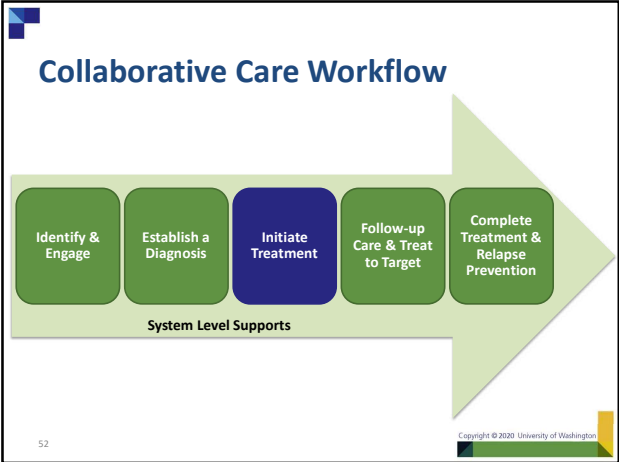

Take a few minutes to reflect on your setting.

- How do you establish a mental health diagnosis in your clinic?
- Who is involved in establishing a diagnosis in your collaborative care program?
- How will the diagnosis be recorded?

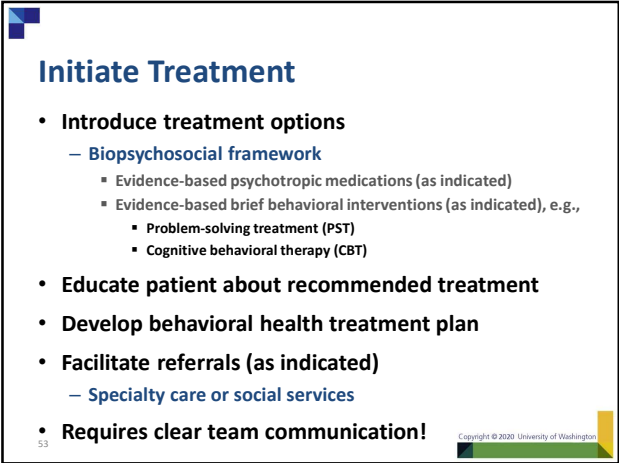

51

Copyright © 2020 University of Washington

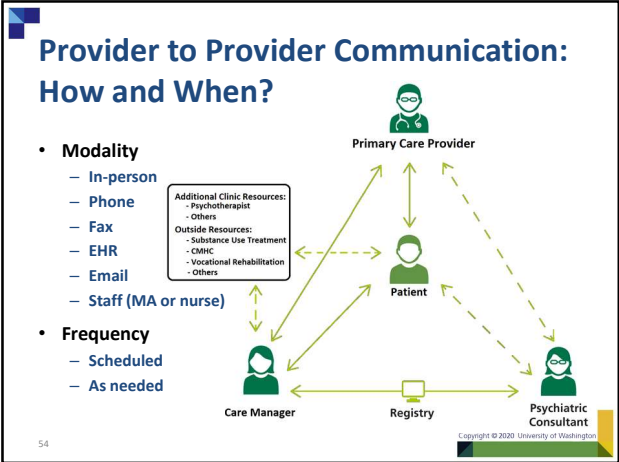

51

52

53

54

Communication: Care Manager and Primary Care Provider

- Goal to efficiently communicate change clinical and functiona

Primary Care Provider

Patient

Care Manager

Registry

Psychiatric Consultant

Copyright © 2020 University of Washington

55

Communication: Care Manager and Psychiatric Consultant

- Goal to provide psychiatric expertise to team

Primary Care Provider

Patient

Care Manager

Psychiatric Consultant

Copyright © 2020 University of Washington

56

Psychiatric Consultation: Model Consultation Hour

- Brief check in
 - Changes in the clinic
 - Systems questions
- Identify patients and conduct reviews
 - New patients
 - Requested by CM
 - Not improved w/o note
 - Severity of presentation
 - Disengaged from care
- Wrap up
 - Celebrate successes
 - Confirm next consultation hour
 - Send any educational resources discussed

Primary Care Provider

Patient

Care Manager

Psychiatric Consultant

57

Checkpoint: Initiate Treatment

Take a few minutes to reflect on what care looks like in your setting.

- Who will introduce treatment options to the patient?
- Will the patient need to make another appointment with PCP?
- How will the CM track the patient’s progress toward getting medication prescribed?
- How will follow-up be scheduled?

58

Follow-Up Care & Treat to Target

“What aspect of treatment can we change to make it more likely that the patient will improve?”

60

Copyright © 2020 University of Washington

Typical Course of Care Management Contact Frequency

- **Active treatment**
 - Until patient has $\geq 50\%$ decrease in symptoms and/or PHQ-9 score under 10
 - Minimum 2 contacts per month
 - Typical during first 3-6 months of treatment
 - Mix of phone and in-person works
- **Monitoring**
 - 1 contact per month
 - After 50% decrease in PHQ-9 achieved, monitor for ~3 months to ensure patient stable

61

61

Key Tasks for Follow-Up Care and Treat to Target

- **Tracking and outreach**
 - Track treatment engagement & adherence
 - Reach out to patients who are non-adherent or disengaged
 - Track symptoms with measurement tools (e.g. PHQ-9)
 - Track medication side effects & concerns
 - Track outcome of referrals & other treatments
- **Treatment adjustment**
 - Assess need for changes in treatment
 - Facilitate changes in treatment plan
 - Proactively adjust treatment if patients are not responding
- **Leverage expertise of psychiatric consultant**
 - Utilize caseload-focused psychiatric consultation focused on non-responding patients
 - Utilize in-person or telehealth psychiatric assessment of challenging patients

Checkpoint: Follow-Up Care and Treat to Target

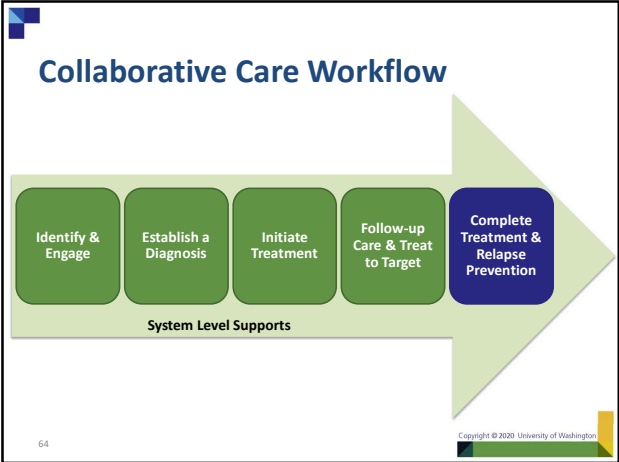

Take a few minutes to reflect on the key tasks at this step of the workflow.

How are they handled in your setting?

63

63

64

Typical Course of Care Management

- 6-10 months in collaborative care treatment (average)
- Best if determined by clinical outcomes, not preset
- 50-70% of patients will need at least one change in treatment to improve
 - Each change of treatment moves an additional ~20% of patients into response or remission
- If preset, minimum 6 months in active treatment with option to extend to 12 months if additional treatment change is wanted

65

Copyright © 2020 University of Washington

65

Key Tasks for Complete Treatment and Provide Relapse Prevention

- Assess for completion of goals
- Create & support relapse prevention plan
- Communicate plan to team

66

68

Provide System Level Supports

- Provide administrative support for program (e.g., scheduling, resources)
- Coordinate communication among team members/providers
- Engage in continuous quality improvement efforts

69

Copyright © 2020 University of Washington

69

Common Misconceptions About Collaborative Care

ALL patients will be treated with medications

→ 10-15% never had medication in original study

ALL patients will receive psychotherapy (brief behavioral interventions)

→ Only 30% of patients in original study ever received psychotherapy

Problem-solving treatment (PST) is the ONLY therapy that can be used

→ PST is a good option, but not the only option

PST is collaborative care

→ Collaborative care is a way of providing care

Collaborative Care Fundamentals

Registry

©2016 University of Washington

73

In This Module

- ✓ What a registry is
- ✓ Who uses the registry
- ✓ How the registry supports the principles of collaborative care
- ✓ How the clinical team uses the registry to support the workflow

74

Copyright © 2020 University of Washington

74

What Is a Registry?

- A tool used to record data
 - Active tracking of individual patient progress and population progress
- “Registry” is a generic term; examples include:
 - Excel spreadsheets
 - Web-based systems

75

Copyright © 2020 University of Washington

75

Who Uses a Registry?

- **Care Managers (CM)**
 - Each CM has their own caseload in a registry
- **Psychiatric Consultants (PC)**
 - The PC views each individual CM caseload
- **Clinical Supervisors/Practice Leadership**
 - Can manually aggregate data from multiple Care Managers (if applicable)

76

Copyright © 2020 University of Washington

76

Registry and EHRs

- Does not automatically link to your EHR
- Concurrent documentation is most efficient
- All members of the care team, including psychiatric consultants, must have access to the EHR

77

Copyright © 2020 University of Washington

77

Registry and HIPAA Compliance

- Must live in a secure, HIPAA-compliant space
- Important to be able to share securely with the psychiatric consultant

78

Copyright © 2020 University of Washington

78

Registry Critical to Support Collaborative Care

- Identify patients who aren't improving
- Prompt changes in treatment
- Track clinical targets
- Facilitate psychiatric consultations
- Show aggregate population improvement data

Delivering Care as a Team

Identify & Engage Establish a Diagnosis Initiate Treatment Follow-up Care & Treat to Target Complete Treatment & Relapse Prevention

System Level Supports

81

Copyright © 2020 University of Washington

81

Identify & Engage

Identify & Engage

Establish a Diagnosis

Initiate Treatment

Follow-up Care & Treat to Target

Complete Treatment & Relapse Prevention

Team activities at this step:

Patient	Completes screening and PCP assessment
Primary Care Provider (PCP)	Introduces concept of collaborative care and also CM, if possible
Care Manager (CM)	Available for warm hand-off, outreach, or appointment with patient, enters patient information into registry
Psychiatric Consultant (PC)	No task yet

82

82

Establish a Diagnosis

Identify & Engage

Establish a Diagnosis

Initiate Treatment

Follow-up Care & Treat to Target

Complete Treatment & Relapse Prevention

Team activities at this step:

Patient	Provides accurate and honest information to PCP and CM
PCP	Reviews/rules out physical causes of mental health distress
CM	Completes assessment and additional screening, records any additional screening results in registry
PC	Reviews screening information in registry , reviews EHR, listens to the CM's observations during case review, determines diagnosis

83

83

Initiate Treatment

Identify & Engage

Establish a Diagnosis

Initiate Treatment

Follow-up Care & Treat to Target

Complete Treatment & Relapse Prevention

Team activities at this step:

Patient	Engages with PCP and CM, asks questions, communicates concerns
PCP	Writes prescriptions, monitors labs, addresses side effects
CM	Educates patient, monitors response, initiates psychosocial interventions, records clinical notes in the EHR and creates an encounter entry in registry at each visit
PC	Monitors response by viewing the measurement scores in the registry , guides CM on patient education

84

84

Follow-up Care &
Treat to Target

Identify & Engage

Establish a
Diagnosis

Initiate
Treatment

Follow-up
Care & Treat
to Target

Complete
Treatment &
Relapse
Prevention

Team activities at this step:

Patient	Works on adherence to medications and behavioral interventions, reports progress or challenges to CM and PCP
PCP	Makes adjustments according to PC recommendations
CM	Monitors response to the initiation of treatment, reviews progress with PC, adjusts behavioral health interventions, <i>records outcome measures at every visit in registry</i>
PC	Assesses response by <i>reviewing outcome measures in registry</i> , recommends changes if needed

85

Prioritizing Patients for Caseload
Review

- Both care manager and psychiatric consultant look at the registry during consultation hour
- Identify patients and conduct reviews
 - Requested by the care manager
 - Not improved without note
 - Severity of presentation
 - Disengaged from care
 - Ready for relapse prevention or referral

86

Complete Treatment &
Relapse Prevention

Identify & Engage

Establish a
Diagnosis

Initiate
Treatment

Follow-up
Care & Treat
to Target

Complete
Treatment &
Relapse
Prevention

Team activities at this step:

Patient	Develops a Relapse Prevention Plan with PCP and CM
PCP	Continues to monitor medication response and implements long-term medication plan
CM	<i>Changes treatment status to "Relapse Prevention," continues to record contacts in registry, and eventually closes episode,</i> helps the patient develop Relapse Prevention Plan and recognize warning signs, educates the patient about maintaining healthy living
PC	Helps PCP develop long-term medication plan

87

Copyright © 2020 University of Washington

Program Management and Clinical Supervision Registry Functions

- Can compare caseload size and patient outcomes across providers or clinics
- Can identify proportion of care management sessions done in-person vs. by phone
- Can identify number of patients needing psychiatric consultation

88
