

AIMS Caseload Tracker

A streamlined web application for behavioral health caseload management

The AIMS Caseload Tracker is a cloud-based, HIPAA-compliant registry for prioritizing and managing behavioral health caseloads in integrated care settings. It runs in parallel to electronic health records while minimizing double data entry to a few essential elements. The design is simple and streamlined while providing powerful tracking and reporting functions:

- Provides reminders for [behavioral health care manager](#) follow-up
- Identifies patients not improving to prioritize for psychiatric case review
- Displays progress over time for individual patients' symptoms using the [PHQ-9](#) and [GAD-7](#)
- Produces interactive caseload reports summarizing symptom score improvement and contact dates
- Calculates real-time statistics like caseload size, length in treatment, and visit frequency
- Facilitates reporting on the [HEDIS Depression Remission and Response measure](#)
- Tracks minutes for [CPT](#) and [G Code](#) Medicare billing

Online Demonstration

A recorded demonstration of the AIMS Caseload Tracker is available online and outlines the functionality and key aspects of supporting measurement-based treatment to target:

2017-2018 Pricing

Health care organizations and clinics can license the AIMS Caseload Tracker for an annual fee. A single license covers use of the software at multiple clinic locations as long as Protected Health Information (PHI) may be visible and shared between the clinics; PHI under a single license will never be shared outside the licensing organization or clinic. At the end of each 12-month license term, organizations may easily extend their use of the AIMS Caseload Tracker by payment of the annual license fee.

Number of Users	Annual License Fee
1-5	\$5,500 per year
6-30	\$8,500 per year
31-50	\$10,000 per year
51-100	\$15,000 per year

Licensing and Use

Health care organizations must sign a license and make UW their business associate in order to use the AIMS Caseload Tracker. The license and instructions can be downloaded and signed from the [University of Washington Express Licensing website](#).
