Relapse Prevention Plan

Date: ________________

Purpose: Depression can occur multiple times during a person’s lifetime. The purpose of a relapse prevention plan is to help you understand your own personal warning signs. These warning signs are specific to each person and can help you identify when depression may be starting to return so you can get help sooner – before the symptoms get bad. The other purpose of a relapse prevention plan is to help remind you what has worked for you to feel better. Both of these put YOU in charge!

Instructions: 1. Fill out this form with your care manager. 2. Put it where you’ll come across it on a regular basis. 3. Use the PHQ-9 on the back to self-assess yourself. 4. If you see signs of returning depression, use your prevention plan.
