AIMS Caseload Tracker

Web-based registry for managing behavioral health caseloads

Streamline Workflows

Designed for Collaborative Care or other integrated care settings, our intuitive registry simplifies sharing patient information across the behavioral health team.

- Behavioral health visits
- Depression, anxiety, PTSD and ADHD symptoms
- Systematic Caseload Reviews

Track Quality Measures

Ensure better outcomes for adult and pediatric populations with measurement-based treatment to target. Our thoughtful analytics expedite the ability to see progress at all levels, making priorities clear.

Simplify Communication

Manage large caseloads with a small team. Our registry facilitates early interventions and regular follow-up care for patients.

Discounted pricing available for non-profit safety net organizations.
